

## 4-POLE RELAY INTERFACING RELECO S9 SERIES

**S9-M** Relay socket 4 pole with integrated retaining clip and white label marker, with two A2 (coil neutral / negative) terminals.

**S9M-BX** Links the coil neutral / negatives from one relay to the next. Only one neutral or negative (AC or DC) cable is required.

**S9M-V1** Links from 'common' power contacts of one relay to the next, and can be used along with S9M-V4 as shown.

**S9M-V4** Links all four 'common' power contacts of a relay, meaning only 1 power cable is required.
